## MEETING OF THE EMSA EUROPEAN BOARD

**PAVIA, 15-20 December 2016**

Every year, EMSA European Board members come together in various European cities to have face-to-face meetings where they can discuss about issues that cannot be managed online. That way the work is done faster, more easily and effectively. During the meeting we also accept observers so you can come and follow the discussions and meet your European Board in person!

### PROGRAMME :

1. Accommodation (15 December)
2. DISCUSSION ABOUT NEW ACTIVITIES AND PROJECTS : Meeting venue to have face-to-face meetings where we can discuss about issues that cannot be managed online. That way the work is done faster, more easily and effectively. During the meeting we also accept observers so you can come and follow the discussions and meet European Board in person!
3. A bigger venue for Open Days to meet a big number of students, (16 December at Aula Volta at University central Building).
4. TOPICS:
  - Empower students to take part in European mobility and exchange programmes, and foster their intercultural understanding and compassion toward disadvantaged groups in society;
  - Empower medical students to defend and actively promote human rights within society whilst raising awareness of ethical matters in healthcare throughout the continent;
  - Empower medical students to take a role in shaping a medical education system, that promotes advances in medicine, new learning technologies, philosophy of education and interprofessional collaboration;
  - Empower medical students to be key pioneers in the popularization of a healthy and active lifestyle, preventive medicine and health education;
  - Empower medical students to raise awareness about mental health issues and health threats in society, and to encourage informed lifestyle choices;
  - Empower medical students to read and publish scientific articles by enhancing their theoretical and practical skills through education and training whilst raising appreciation of medical science;
  - Empower medical students to play an active role in the European advocacy of lifestyle policies, and collaborate with relevant partners in the implementation of objectives related to public health.
