

Immunotherapy for Infectious Diseases Conference

November 12-14, 2018
Hotel Galvez, Galveston, TX, USA

Immunotherapy represents a promising approach to treating life-threatening infections, especially in a time of global antimicrobial resistance, emerging and re-emerging infectious diseases and few antibiotics in the development pipeline. The Immunotherapy for Infectious Diseases Conference, organized at the interface between academia and industry, will showcase recent progress and serve as a forum for the exchange of ideas and cross-disciplinary collaborations.

CONFERENCE HIGHLIGHTS

- Keynote seminars from international experts in both academia and industry
- Presentations on novel therapeutic techniques for immunotherapy
- Poster sessions to promote novel approaches and young investigators

KEYNOTE SPEAKERS

- Dr. John McCafferty
- Dr. Gary Kobinger
- Dr. Janice Reichert

SESSION TOPICS

- Antibody-based drug development
- Immunotherapy against viral infections
- Immunotherapy against bacterial infections
- Immunotherapy against emerging infectious diseases
- Emerging novel therapeutics
- Challenges of immunotherapy against infectious diseases
