

Short bio:

Professor Gordon Wallace's research interests include organic conductors, nanomaterials and electrochemical probe methods of analysis and the use of these in the development of intelligent polymer systems. He has pioneered the development of 3D additive fabrication (including 3D printing) using advanced materials.

He is a Fellow of the Australian Academy of Science, Australian Academy of Technological Sciences and Engineering (ATSE), Institute of Physics and Royal Australian Chemical Institute (RACI). He is a foreign correspondent of the Accademia delle Scienze dell'Istituto di Bologna. He has published in excess of 1,000 refereed publications that have attracted some 40,000 citations.
