

February 2021

**POSITION:** Group leader @ The Summer Master in Sustainable Citizenship, UN CAMPUS, in Turin, Northern Italy

**THE PROJECT:**

In the context of an agreement with the Turin United Nations campus, we are elaborating a study program to be conducted in English for students aged 11 to 14 and 15 to 18, concerning the themes of the Sustainable Development Goals for the year 2030. Our aim is to help our students become *sustainable citizens*: young people aware of their own potential and of the great challenges that await them, able to begin imagining how to use their own talents in the search for possible solutions for the community.

To expose the students to the English language on the one hand, and on the other to concrete experiences and examples of best practices, we are selecting young professionals from diverse backgrounds with a story to tell about the theme of sustainable development: experience as volunteers; work with NGOs; studies in scientific fields focusing on digitalisation, green energy, nano-technology, robotics, AI, or innovative economic models...

**WHO WITH:** I Viaggi di Tels and the Cultural Association Il Mondo di Tels/The World of TELS. We are a Tour Operator specialising in high quality educational tourism in English, in Italy, UK, Australia and USA. For many years now we have been teaching English through cultural exchanges and immersion experiences, and have developed a teaching method that allows young people to enhance their personal growth, in English. Full details will be communicated to candidates who pass the first two phases of the selection process.
