Ph.D. School of Electrical and Electronics Engineering
and Computer Science

Seminar series
THz Communications: devices, antennas, digital electronics

Dr. Josep M. Jornet
Ass. Prof. @ Northeastern University, Boston (MA)

16:00-18:00 May 3rd, 2021: THz communication networks

14:00-16:00 May 5th, 2021: THz modem and antenna arrays

14:00-16:00 May 7th, 2021: Digital electronics for ultra-broadband systems

[Zoom Link](#)

Meeting ID: 832 1555 2948

Passcode: 642724

Abstract

The Terahertz (THz) band (100 GHz to 10 THz) is seen as a key technology to be used in the near future. Within this short course, an overview of the state of the art of transceivers in the THz band will first be presented, outlining the possible architectures of transmitters and receivers, with focus on modems, antennas, antenna array, and digital electronics.

Biography

Josep Miquel Jornet is an Associate Professor in the Department of Electrical and Computer Engineering, the director of the Ultrabroadband Nanonetworking (UN) Laboratory, and a member of the Institute for the Wireless Internet of Things at Northeastern University. He received the Degree in Telecommunication Engineering and the Master of Science in Information and Communication Technologies from Barcelona School of Telecommunications Engineering (ETSETB), Universitat Politècnica de Catalunya, Spain, in 2008. From September 2007 to December 2008, he was a visiting researcher at the Massachusetts Institute of Technology, Cambridge, under the MIT Sea Grant program. He received the Ph.D. degree in Electrical and Computer Engineering from the Georgia Institute of Technology, Atlanta, GA, in August 2013. Between August 2013 and August 2019, he was in the Department of Electrical Engineering at the University at Buffalo, The State University of New York.

Organizer

Prof. Paolo Gamba

Ph.D. Coordinator

Prof. P. Di Barba

Seminar in English
