SKILLS IN BREAKING BAD NEWS

Pavia, 07 MAGGIO 2016

Ore 08.30

**Sede: AULA DIDATTICA S.MARGHERITA,
Via Emilia 12**

OBIETTIVO FORMATIVO

CORSO ADE CFU 1

We describe a protocol for disclosing unfavorable information—"breaking bad news"—to patients and their parents about illness or negative events. Straightforward and practical, the protocol meets the requirements defined by published research on this topic. The goal is to enable the clinician to fulfill the four most important objectives of the interview disclosing bad news: gathering information from the patient, transmitting the medical information, providing support to the patient, and eliciting the patient's collaboration in developing a strategy or treatment plan for the future. Doctors, Residents, social workers, and medical students who have been taught the protocol have reported increased confidence in their ability to disclose unfavorable medical information to patients.
